OBJECTIVE

First-year B.Tech. CSE (AI & ML) student passionate about frontend development, UI/UX design, and responsive web creation. Skilled in building modern, user-friendly web interfaces using React, Next.js, Tailwind CSS, WordPress, and Elementor. Seeking opportunities to contribute to real-world web development projects while continuously improving design and technical skills.

SKILLS

Languages	HTML5, CSS3, JavaScript, Python, Golang
Frameworks & Libraries	React, Next.js, Tailwind CSS
Tools & Platforms	WordPress, Elementor, Figma, Git, Vercel, GitHub Pages
Concepts	Responsive Design, Component-based UI, REST API Integration, UI/UX Design Principles

PROJECTS

Coaching Institute Website | WordPress, Elementor, Figma Live Site · Figma

- Designed and developed a fully responsive coaching institute website using Figma, WordPress, and Elementor.
- Integrated custom contact forms, a Google Maps embed, and a WhatsApp CTA following modern UI/UX principles.
- Focused on clean spacing, typography, and business-oriented UI design to enhance the overall user experience.

Portfolio Website | React, Tailwind CSS, JavaScript Live Site

- Designed and developed a modern developer portfolio showcasing projects, skills, certifications, and hackathon participation.
- Built reusable, responsive UI sections using React components and Tailwind CSS.
- Implemented smooth page navigation, responsive layouts, and optimized deployment on Vercel.

NextJS Notes | Next.js, React, Tailwind CSS Live Site

- Developed an interactive, visual-first platform for learning Next.js featuring step-by-step rendering flowcharts.
- Implemented custom interactive sandboxes to simulate client-side rendering (CSR) state updates and server-side rendering (SSR) paint layers.

Meal Master Smart Recipe Finder | React, REST API Live Site

- Built a recipe discovery application that fetches and displays meal data dynamically from a public REST API.
- Implemented a responsive card-based layout and real-time recipe search functionality.
- Applied React state management and asynchronous data fetching to render content dynamically.

Pustak Notepad | Python, Tkinter GitHub

- Developed a desktop text editor featuring multi-tab support and productivity-focused utilities.
- Implemented find-and-replace, line numbering, file handling, and dark mode customization.
- Utilized event-driven programming paradigms in Python to build a clean and responsive desktop interface.

EDUCATION

Newton School of Technology 2025 – 2029

B.Tech. in Computer Science and Engineering (AI & ML) · Pune, Maharashtra

RELEVANT COURSEWORK

DSA, Object-Oriented Programming, Web Development Fundamentals, Database Basics

ACHIEVEMENTS & ACTIVITIES

- Secured a **Top 10 finish** in the **Impact India Hackathon**, collaborating in a 24-hour coding event to build deployable real-world solutions. [\[Certificate\]](#)
- Actively expanding skills in React, Next.js, WordPress, UI/UX design, and responsive web development through hands-on projects.
